## Historical essay

Javier Martínez-Pinna

Tunnels, maps and strange explorers: discover the true story of the great pirate treasures, of the fortunes of Attila, Atahualpa, Moctezuma or Genghis Khan. A comprehensive overview of the history of lost treasures and their greatest enigmas; from the pre-Columbian El Dorado and the Templar gold to the secret treasures of the Second World War.

### Synopsis

*Great Hidden Treasures* tells the history of some of the most sought treasures of all time in a lively and entertaining way. In this book, Javier Martínez-Pinna is in "explorer" mode again in order to try to discover and identify the places in which those treasures were hidden in the past.

Come with us to the lush jungles of Central America to locate several legendary pirate treasures and help us to find the graves of relevant historical figures, such as Alexander the Great, Alaric, Attila, and Genghis Khan. Try to solve the clues the abbot Saunière left us to discover the location of the unknown treasure of Rennes-le-Chateau.

We will try to follow the steps of the last Templars through the pages of this book, and we will join them in the mysterious journey they started in order to hide their wealth in a safe place. Eventually, following more clues, we will move to the New World to find El Dorado or the fortunes of Atahualpa and Moctezuma.

### Biography

**Javier Martínez-Pinna** is a professor of history and has worked in several archaeological campaigns; in Iberian, Roman, and medieval deposits. He has also collaborated with various media, publishing articles in the press and participating in several radio programs like "La otra mirada" and "Castillos en el aire".

He has specialized in the study of the conundrums and power objects of the past in recent years. He is also the author of *El nombre de Dios*, an essay in which he tries to discover the real nature and history of the famous King Solomon's Table.

### Sales pitch

- This work gathers for the first time in a single volume a comprehensive overview of all the greatest hidden treasures of history, from the most popular to the most mysterious.

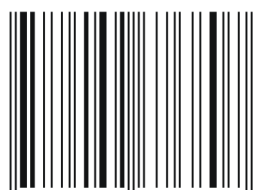

- This book is written by a professor of history in a very appealing and didactic way, but it is also rigorous with historical data.

-This work offers different theories and tries to avoid subjective views and unproven facts. The author lets the readers decide which hypothesis they find more convincing, stimulating their desire for knowledge.

-This book can be seen as an attractive tour guide through places and countries that played an important role in human history.

-The book is profusely illustrated. It contains 60 illustrations and maps, photographs of places and portraits of the protagonists... that add a new dimension to the work and help to historically contextualize these treasures.
